3	OUTPUT CODE	24-26
4	CONCLUSION	27

INTRODUCTION

The Personal Portfolio Website is a responsive web-based project developed using HTML and CSS to showcase personal information, academic qualifications, technical skills, services, projects, and contact details in a clean and professional manner. The website is designed with a modern layout that includes sections such as Home, About, Skills, Services, Education, Projects, and Contact. HTML is used to structure and organize the content, while CSS is used to create the visual design, including colors, typography, spacing, cards, buttons, navigation, timeline, and responsive layouts. The website also uses CSS media queries to ensure proper display across desktop, tablet, and mobile devices. The project demonstrates the practical implementation of front-end web development concepts to create an attractive, responsive, and user-friendly personal portfolio.

About Me

Get to know me

Passionate About Technology

I'm Shivam Behera, a passionate technology enthusiast and web developer who enjoys creating digital experiences that are simple, functional and visually appealing.

I have experience working with frontend technologies, programming languages and database technologies. I continuously explore new tools and technologies to improve my development skills.

My goal is to build useful digital products while continuously learning and growing as a developer.

Name Shivam Behera	Role Web Developer
Education Computer Science	Location Bangalore, India

My Skills

Technologies I work with

HTML

Building structured and semantic web pages.

CSS

Creating responsive and attractive interfaces.

JavaScript

Adding interactive functionality to websites.

Python

Developing programs and solving problems.

React

Building modern component-based applications.

MySQL

Managing and working with relational databases.

Java

Object-oriented programming and application development.

C++

Programming fundamentals and problem solving.

What I Do

Services and areas I work in

Web Development

Creating responsive, modern and user-friendly websites using HTML, CSS and JavaScript.

Frontend Development

Developing interactive user interfaces using React and modern frontend technologies.

Python Development

Creating Python applications and solving programming and data-related problems.

Education

My academic journey

2026 - 2028

MCA – Generative AI

Alliance University, Bangalore — Currently pursuing Master's in Computer Applications with a specialization in Generative AI.

2023 - 2026

B.Sc. Computer Science

University of Mumbai — Completed Bachelor of Science in Computer Science.

2020 - 2022

Higher Secondary Certificate (HSC)

S.K. Somaiya Vinaymandir — Completed Higher Secondary education.

2020

Secondary School Certificate (SSC)

Holy Cross High School — Completed Secondary School education.

My Projects

Some of my recent work

Food Delivery

Food Delivery System

A Python-based food delivery application that handles orders, delivery charges, discounts and customer details.

[View Project →](#)

Employee System

Employee Management System

A desktop application developed using Python, PyQt5 and MySQL for managing employee information.

[View Project →](#)

Smart Canteen

Smart Canteen Ordering

A modern web application concept for browsing menus, placing orders and managing canteen operations.

[View Project →](#)

Portfolio

Personal Portfolio

A responsive personal portfolio website created using HTML and CSS to showcase skills, projects and experience.

[View Project →](#)

Data Science

Data Science Projects

Programming and data analysis projects focused on solving practical problems using Python.

[View Project →](#)

UI/UX

UI/UX Designs

User interface and user experience concepts designed with a focus on usability and clean visual design.

CONCLUSION

The Personal Portfolio Website successfully demonstrates the use of HTML and CSS to develop a structured, responsive, and professional web interface. The project provides an organized presentation of personal details, education, skills, services, projects, and contact information. CSS styling, grid layouts, flexbox, hover effects, color schemes, cards, and responsive media queries enhance the overall appearance and usability of the website. Through this project, fundamental front-end development concepts such as webpage structure, styling, layout design, responsiveness, and user-friendly navigation were practically implemented. Overall, the project provides a simple and effective digital platform to present professional and academic information online.
