INTRODUCTION

A resume website is a responsive web-based project developed using HTML and CSS to present a individual's professional profile, educational background, technical skills, work experience, achievements and contact information in a clear and organized manner. The website follows a clean and professional layout with sections such as profile, career objectives, education, skills, experience, project, certifications and contact details. HTML is used to structure and arrange the resume content, while CSS is used to design the visual appearances, including colours, typography, spacing, section, layouts, buttons, and responsive elements. CSS is used to design the visual appearance, including colours, typography, spacing, section, layouts, buttons, and responsive elements. CSS is used to design the visual appearance, including colour.

OUTPUT

Ashraj Singh Rana

MCA Student | Full-Stack Developer

Email: ashrajsingh9@gmail.com Phone: +91 9827900755 India

Career Objective

I am an MCA student who enjoys building simple and useful websites. I am looking for an opportunity to improve my development skills and work on real-world projects.

Education

Master of Computer Applications (MCA)

Alliance University | Expected graduation: 2026

Technical Skills

- HTML
- CSS
- JavaScript
- React
- Node.js
- Express
- MongoDB
- Git

Projects

BALANCEO — Finance Management Web App

React · Node.js · Express · MongoDB · TypeScript · JWT · Recoil · Render

- Migrated full codebase from JavaScript to TypeScript, fixed broken production build pipeline, and deployed on Render with UptimeRobot health checks.
- Implemented JWT authentication, bcrypt password hashing, protected routes, Recoil state management, and income/expense analytics dashboard.

CATCHUP — Real-Time Chat Application

MongoDB · Express · React · Node.js · WebSocket

- Built real-time messaging using WebSocket connections with privacy-first architecture — users communicate via unique private IDs, no personal data exposed.

BOOKVAULT — Library Management System

Python · Django · Django ORM · SQLite · HTML · CSS

- Full-stack library system with role-based dashboards for librarians and students — book issuance, returns, fine tracking, and availability counts using Django ORM.

Certifications

Full Stack Development Cohort (MERN)

NPTEL — Programming with Generative AI

Strengths

- Willingness to learn new technologies
- Problem-solving and attention to detail
- Teamwork and communication

CONCLUSION

Resume website successfully demonstrates the use of HTML and CSS to create a structured, responsive and professional digital resume. The project presents personal information, career objective educational qualifications, technical skills, work experience, projects, certifications, and contact details in a clear and organized format. CSS styling, flexible layouts, color schemes, typography, section cards, hover effects, and responsive media queries improve the visual appearance and usability of the website. Through this project, essential front end development concepts such as webpage structure, styling, responsive, design, layout management and user-friendly navigation were practically implemented. Overall, the project provides an effective online platform for presenting an individual's professional profile.
